FULL STACK

Verdethos -DFDD Platform

Tech Stack

Backend: Node JS
 Frontend: Angular
 Database: PostgreSQL
 Tech Stack: Serverless Lambda, S3, RDS, Cognito, CloudFront, CloudFormation, API Gateway, Route 53

About

This is an application developed for determining and storing traceability for a product going through supply chain. The project also involved doing deforestation analysis based on data from third party sources.

Waymed (<https://waymed.com>)

Tech Stack

Backend: Node JS, PHP
 Frontend: Angular
 Database: MySQL
 Server: AWS EC2 (Node JS), AWS S3 (Angular), AWS RDS(DB)

About

This is an e-commerce application which lists available healthcare services in and around a zipcode or area in US. Users can compare prices from different providers and book appointments with them using the platform.

Fantazyr (<https://fantazyr.com>)

Tech Stack

Backend: Node JS
 Frontend: Angular
 Database: MySQL
 Server: AWS (EC2, RDS, S3), Firebase (Authentication, Analytics)

About

This application provides the users with games related to stock market. Users can play either a daily game where they can estimate whether their portfolio would go up or down in a day or a sponsored game where they can estimate their portfolio's value at the end of a specified time period.
